Nishit Singh (he / him)

cv / blog / github

hey, i'm nishit. i study physics and engineering at the birla institute of technology and science (bits), pilani. currently, i'm interested in the unconventional ways physics interacts with ai, specifically world models, interpretability, and the likes.

i'm going to be pursuing my master's thesis with dr. kokil jaidka at nus, singapore. i've previously been associated with the csir national thin film laboratory (summer research intern), postman innovation labs and the kalipatnapu extended reality lab, and have had the privilege to be guided by dr. gaurav sharma in my exploits studying finite element methods. in what seems like another life, i worked with pieds, bits pilani as a student founder.

ive also found joy working with the film-making club (fmac) and the cinema and literature club (matrix) at bits.

i try to write about what i find interesting in life on my blog. in a discussion with a close friend, we came to the realisation that archiving might be the cornerstone of human community. read here.

taken at [xyz] in [xyz]. some of the best [xyz] is sold here.

research

Causal Evidence of Stack Representations in Modeling Counter Langauges Using Transformers
Nishit Singh
ICLR 2026 (Accepted at the Logical Reasoning of LLMs workshop)
arXiv

projects

Finite Element Analysis with Transient Force Integration
Nishit Singh, Gaurav Sharma
March 2026
GitHub

Simulating Lightly Interacting Particles Using the Ising Model
Nishit Singh
August 2025
GitHub

Implementing Regression Models for Predicting Faulty CNC Machining Processes
Nishit Singh
October 2025
GitHub

Generating 3D Models from 2D images
Nishit Singh (following authors of the LGM paper)
January 2025
GitHub

Modelling crowd evacuation using ABM
Nishit Singh
February 2025
GitHub

Implementing Unpaired Image-to-Image Translation using Cycle-Consistent GANs
Nishit Singh
January 2025
GitHub

miscellaneous

I think of you often
